Unique, one of a kind fireplace, created by the great mind. It seems that nothing more can be added to the fireplaces as we know them. The fireplace design clearly fits into the interior concept being an integral thereof. Fireplace is very unusual in its shape, the presence of animal sculptures, and a combination of materials. The Emperor marble resembles a tortoise shell was used.

In 2014 the concept of the interior and the idea of a fireplace were developed by AVA DESIGN architectural bureau (Moscow). Chief architect: Angelina Romanovna Buzova, sculptor: Mikhail Vasilevich Baskakov.

Development and implementation of the idea: workshop of the “Fireplaces of Petersburg” firm.

Fireplace cost is on demand.
