Fireplace in Art Deco style.

The name of the fireplace is not accidental: it refers not only to the ancient Greek gods and temples, but also to the Russian magazine "Pantheon" (1840-1856), dedicated to the history of the theater and dramatic literature.

Strict lines of the fireplace are not devoid of artistry. Decorative elements are both static and expressive. The fireplace is designed for a refined and modern interior.

The price of the fireplace is on request.
